January 29, 2021

Dear Valued Customer,

This letter serves as a formal notice that Laversab, Inc is beginning the end-of-life process for the **6300L & 6600 Legacy Series** products. We are providing notice to allow you to plan appropriate actions related to the product end-of-life. Below, we indicate the relevant dates for last time purchases and suggestions for alternative Laversab products. We will honor all existing product warranties and service contracts, and we will attempt to provide service and support beyond the stated last service date.

Laversab 6300L & 6600L End of Life Schedule:

Milestone	Date
End of Life notice	January 29, 2021
Last Order date	June 30, 2021
Last Service date	June 30, 2028

Recommendations for new designs:

EOL Product	Description	Replacement Product	Description
Model 6300L P/N: 131-0149	RVSM 2-channel Ramp tester with automated control	Model 6300 P/N: Various	RVSM 2-channel Ramp tester with automated control & Wifi
		Model 6200 P/N: Various	Non-RVSM 2-channel Ramp tester with automated control & Wifi (for Helicopters & GA)

EOL Product	Description	Replacement Product	Description
Model 6600L P/N: 131-0185	3-channel Ramp tester with automated control	Model 6600-NG P/N: Various	RVSM 3-channel Ramp tester with automated control & Wifi

The replacement products in both cases have smaller footprints and perform as well or better than the EOL products. They are typically lower cost options as well. The replacement products have been on the market for several years and are widely used and accepted.

If you have any questions or want to discuss alternative products, please contact your Laversab representative or email [sales@laversab.com](mailto:sales@laversab.com).

Sincerely,

Chandra Nilekani  
 Operations Manager
